

# Heritage Sites of India Image Gallery

Welcome to the **Heritage Sites of India Image Gallery**, a simple project showcasing breathtaking images of India's rich cultural heritage sites. This project is built using HTML and CSS, making it easy to understand and modify for beginners and enthusiasts alike.

## Project Overview

India, with its diverse cultural heritage, boasts numerous iconic sites that narrate stories of the past. This project brings together a collection of high-quality images capturing the beauty and grandeur of these heritage sites. Explore the mesmerizing architecture, intricate carvings, and historical significance of these sites through our carefully curated gallery.

## Technologies Used

- **HTML:** Used for structuring the web pages and displaying the content.
- **CSS:** Used for styling the HTML elements and creating an attractive user interface.

## Features

- **Responsive Design:** The gallery is designed to be responsive, ensuring seamless viewing across various devices and screen sizes.
- **Easy Navigation:** Simple and intuitive navigation allows users to explore different heritage sites effortlessly.
- **High-Quality Images:** High-resolution images that vividly capture the essence of each heritage site.
- **Minimalistic UI:** A clean and minimalistic user interface to enhance the user experience and focus on the images.

- **Hover Effects:** Interactive hover effects on images to provide a visually engaging experience.
- **Customizable:** Easily customizable codebase, allowing developers to add more sites or modify the existing ones.

## How to Use

### 1. Clone the Repository:

```
git clone https://github.com/abhinay-kumar47/heritage-sites-gallery.git
```

### 2. Open the Project:

```
cd heritage-sites-gallery
```

### 3. Explore the Gallery:

- Open the `index.html` file in your favourite web browser to start exploring the heritage site's image gallery.
